SUBJECT: Painting Peel & Seal

Peel & Seal in all finishes (Aluminum, Almond, Granite Gray, and White) may be painted with traditional exterior grade paints or may be coated with liquid roof coatings.

MFM recommends that the outer surface of the Peel & Seal be cleaned before painting or coating to remove any oils, asphalts, dust, or dirt that may interfere with adhesion.

Peel & Seal is easily cleaned with acetone, denatured alcohol, or similar non-oily solvent. Just wipe the outer surface with solvent and let dry before painting or coating.

For extremely dirty surfaces, MFM recommends first power washing the Peel & Seal and then wiping the surface with a solvent.

MFM also recommends that a small sample of Peel & Seal be prepared and painted or coated to ensure that the selected paint or coating will adhere properly.

While Peel & Seal has a 10-Year Limited Warranty, this warranty only applies to the factory surface and material and does not cover any paint or coating applied after installation.
